-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 23 February 2009 has been entered.

Specification

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-30 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to

Art Unit: 2618

which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The amendment to independent claims 1, 9, 12 and 22 with regard to the composition of the clear to send (CTS) and the request to send signal (RTS) is not supported in the Specification. Paragraphs 0026 and 0027 of the Specification indicates the clear to send signal (CTS) includes a first section comprising information used to indicate an interval of time during which a communication station having an address that is not included in the *request to send* (RTS), not the clear to send signal, must stop its communication operation. Further, the second section of the CTS is identified to include reference information known to the first communication station, not the address of said first communication station. It is noted claim 4 indicates the second communication station transmits the clear to send signal including its own address without reference to a first or second section of the CTS which is supported by paragraphs 0024, 0026 and 0027 where the address of said second communication station is included in the TA section of the CTS. Clarification for the amendment is required.

Also, in contradiction to the amendment to claims 1, 9 and 12, claim 22 retains the concept the second section of the CTS includes the address of the said communication apparatus or the second communication station. Further, the Specification does not specify the identity of the communication apparatus to generate the CTS is included in the second section of the CTS.

Conclusion
